GTP v13.5.0 Protocol Modules for TTCN-3 Toolset with Titan, Description

Abstract

This is the description for the GTP v13.5.0 protocol module. The GTP v13.5.0 protocol modules are developed for the TTCN-3 Toolset with Titan. This document should be read together with Product Revision Information [3].

1 Functionality

The GTP v13.5.0 protocol module implements the message structures of the related protocol [5] in a formalized way, using the standard specification language TTCN-3. This allows defining of test data (templates) in the TTCN-3 language and correctly encoding/decoding messages when executing test suites using the Titan TTCN-3 test environment.

Prepared (also subject responsible if other) ETMEMOD Timea Moder		No. 1551-CNL 113 843 Uen		
Approved BNEPIEBBBACB [Julianna Rózsa]	Checked ETHGASZ	Date 2016-09-26	Rev A	Reference

The GTP v13.5.0 protocol module uses Titan's RAW encoding attributes [4] and hence is usable with the Titan test toolset only.

1.1 Implemented protocols

This set of protocol modules implements protocol messages and constants of the GTP v13.5.0 protocol as described in [5] and [6]. The GTPC and GTPU messages are in separate files and have their own separate encoding functions.

1.1.1 Modified and non-implemented Protocol Elements

None.

1.1.2 Ericsson-specific changes

None.

1.2 Backward incompatibilities

None

1.3 System Requirements

Protocol modules are a set of TTCN-3 source code files that can be used as part of TTCN-3 test suites only. Hence, protocol modules alone do not put specific requirements on the system used. However, in order to compile and execute a TTCN-3 test suite using the set of protocol modules the following system requirements must be satisfied:

- Titan TTCN-3 Test Executor version CRL 113 200/5 R4A (5.3.pl0) or higher installed. For Installation Guide see [2]. Please note: This version of the test port is not compatible with Titan releases earlier than CRL 113 200/5 R4A.

2 Usage

2.1 Installation

The set of protocol modules can be used in developing TTCN-3 test suites using any text editor; however, to make the work more efficient a TTCN-3-enabled text editor is recommended (for example `nedit`, `xemacs`). Since the GTP v13.5.0 protocol is used as a part of a TTCN-3 test suite, this requires TTCN-3 Test Executor be installed before the module can be compiled and executed together with other parts of the test suite. For more details on the installation of TTCN-3 Test Executor see the relevant section of [2].

2.2 Configuration

None.

2.3 Examples

None.

3 Interface description

3.1 Top Level PDU

The top level PDUs are the TTCN-3 records `PDU_GTPU` and `PDU_GTPC`.

3.2 Encoding/decoding and other related functions

This product also contains encoding/decoding functions, which assure correct encoding of messages when sent from Titan and correct decoding of messages when received by Titan.

3.2.1 Implemented encoding and decoding functions

<u>Name</u>	<u>Type of formal parameters</u>	<u>Type of return value</u>
<code>enc_PDU_GTPC</code>	<code>in PDU_GTPC</code>	<code>octetstring</code>
<code>dec_PDU_GTPC</code>	<code>in octetstring</code>	<code>PDU_GTPC</code>
<code>enc_PDU_GTPU</code>	<code>in PDU_GTPU</code>	<code>octetstring</code>
<code>dec_PDU_GTPU</code>	<code>in octetstring</code>	<code>PDU_GTPU</code>
<code>dec_PDU_GTPU_ext</code>	<code>in octetstring</code>	<code>PDU_GTPU_ext</code>

4 Terminology

4.1 Abbreviations

PDU	Protocol Data Unit
GTP	GPRS Tunnelling Protocol version 2
GTPC	GTP Control
GTPU	GTP User
TTCN-3	Testing and Test Control Notation version 3
